

Dear Family & Friends of Richard & Betty Persons,

I would like to thank you for the generous contribution to my undergraduate education through the Norman and Betty Scholarship. I am entering my junior year at the University of Maine studying marine biology. Much like Norman & Betty I have lived my whole life in the Lakes Region which helped to inspire my desire to become a marine biologist, to protect the beauty of lakes such as ours. My niece & nephew live in Gilford where the Library is a big part of their lives & I think it's extremely cool that Betty helped to advocate for the building of the structure.

Thank you for your generosity,
Sean Engelsen
